

Collect. Organise. Publish.

Bringing your whole brand's content workflow in one workspace.

Three steps, one workspace.

01

Collect

UGC forms, imports and drops -
every asset flows into one library.

02

Organise

AI tagging, smart collections and
search that actually finds things.

03

Publish

Approvals, scheduling and analytics
across every platform.

Brands We Jam With

GIRLS *with* GEMS

BELANCÉ

SPORTSCRAFT

"The speed is the real game changer. Getting our content from our shoots live on Shopify used to take days, and now it happens in minutes."

John Halias

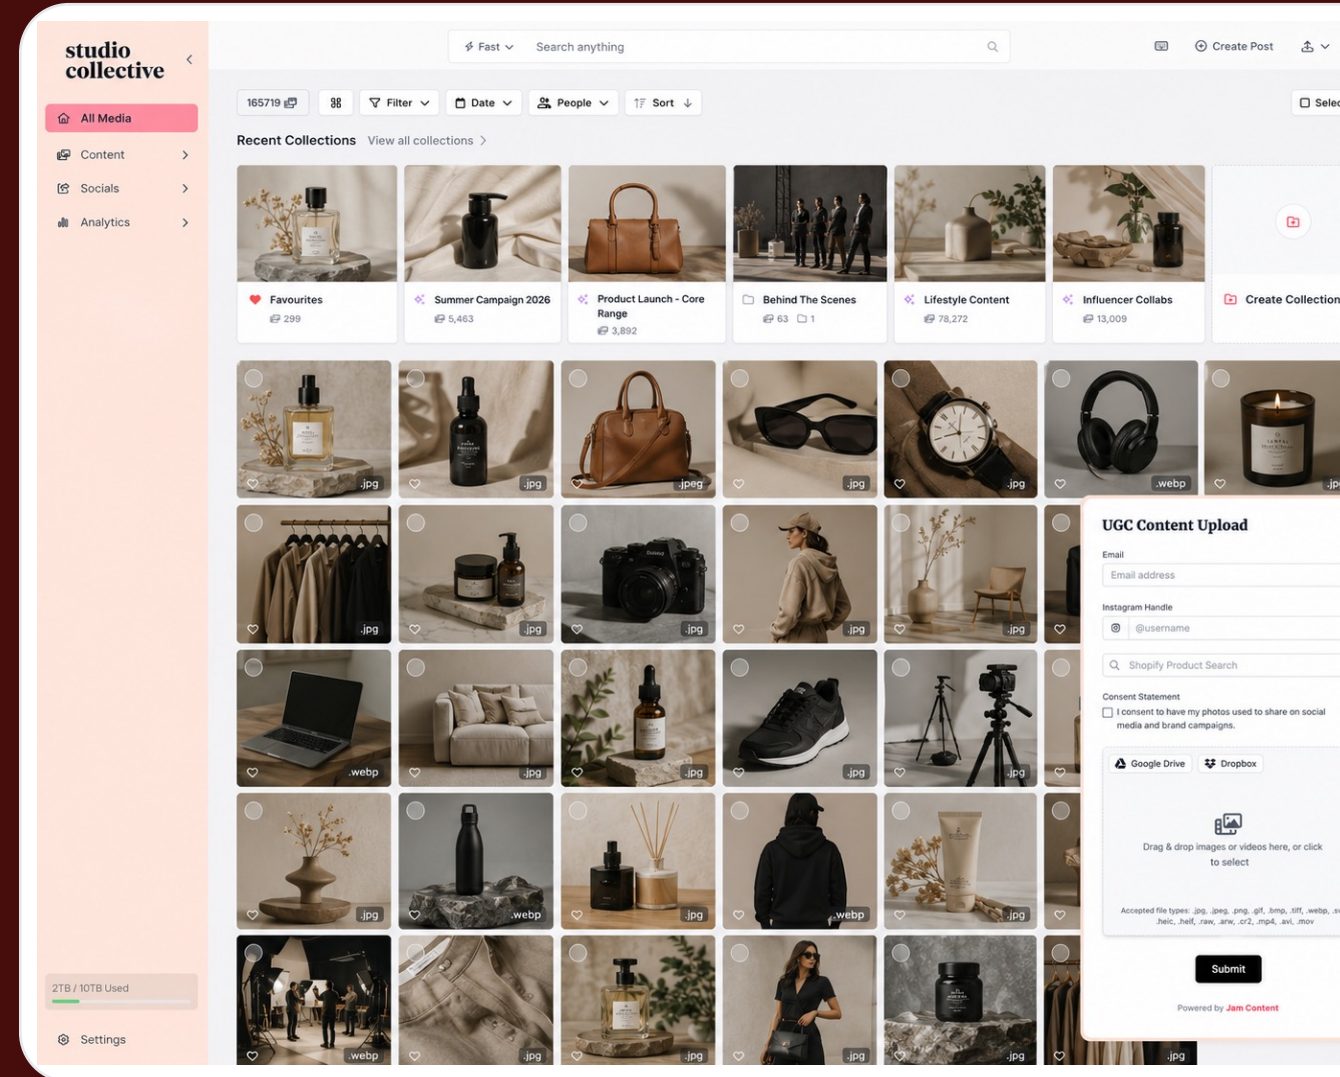

COO, Girls With Gems

STEP 01

Collect Media

Bring photos and videos in from anywhere - one library, one source of truth.

STEP 01 · COLLECT

Collect

- **Upload**

No size limits and support for every image and video format - including RAWs.

- **User Generated Content (UGC)**

Collect the content your community creates - upload forms, tagged posts and mentions, straight from your socials.

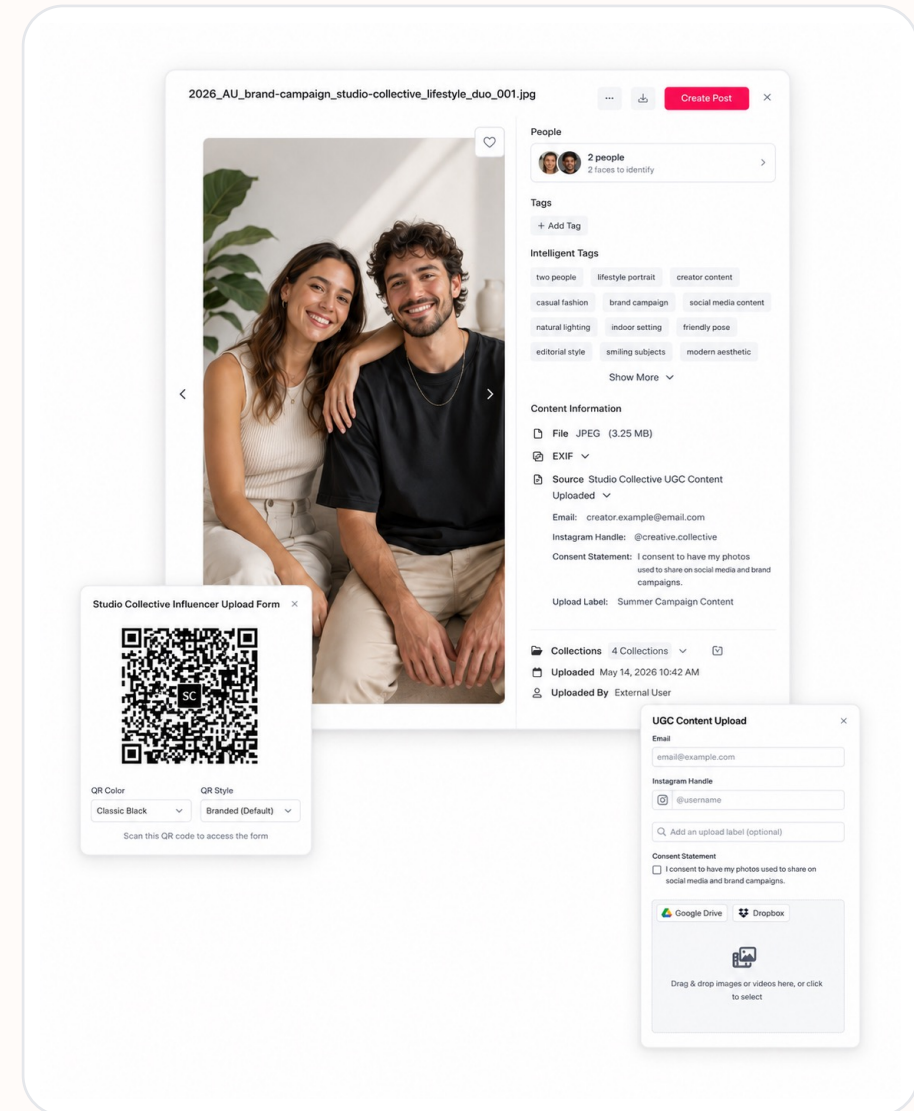

- **Shopify Product Tag**

Tag media to your Shopify products so every asset is linked to what it features.

- **iOS & Android App**

Capture and upload on the go - photos land straight in your library.

STEP 02

Organise Your Content

AI-powered search and smart collections, so anyone can find anything in seconds.

Organise

- **Organising, Searching, Filtering**

AI tags every file automatically, so you can search by what is actually in the shot.

- **Collections**

Group media into shared collections for campaigns, events and teams.

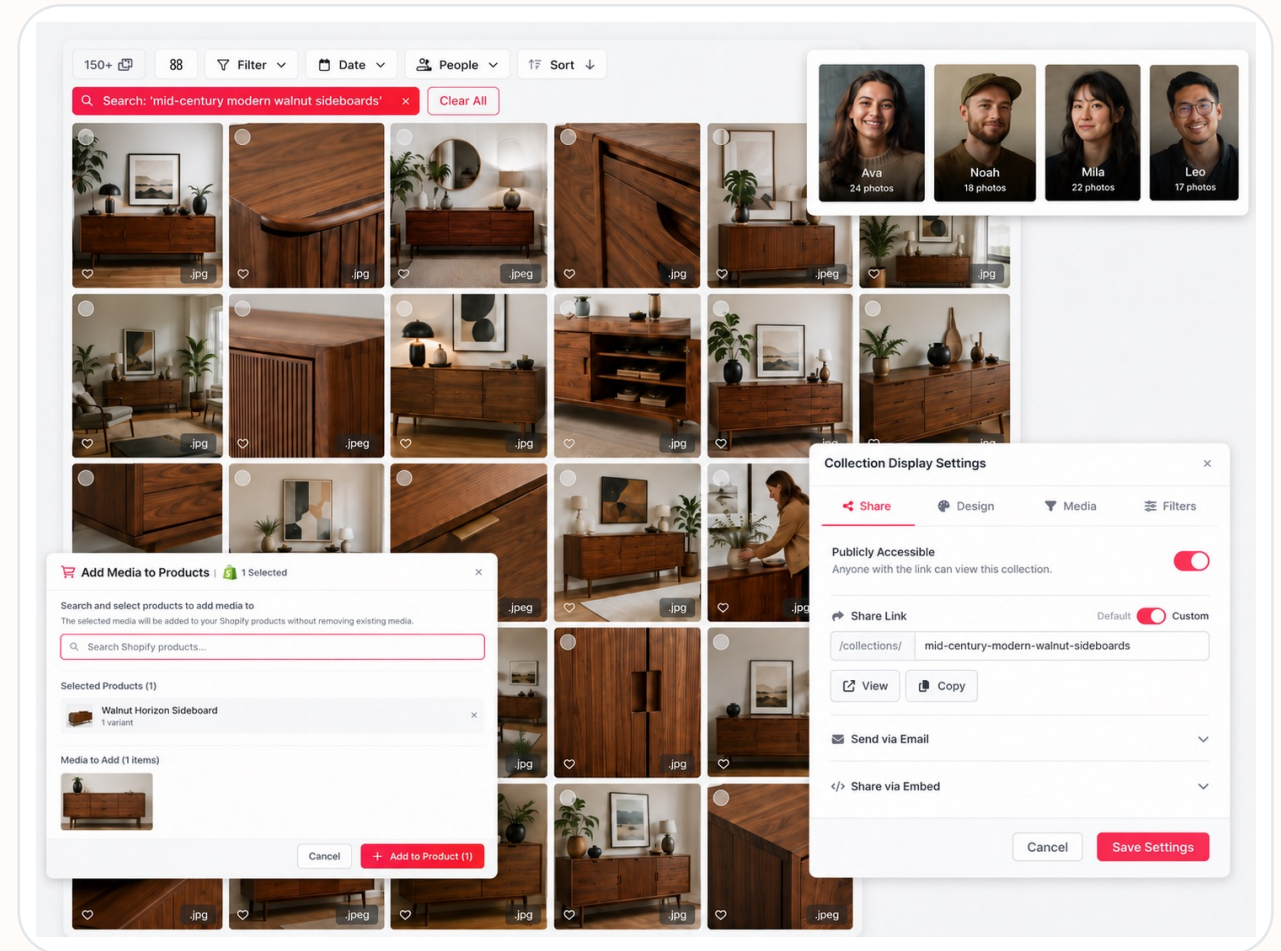

- **Smart Collections**

Set the rules once and new media sorts itself into the right place.

- **People Face Detection**

Find every photo of a person in one click with automatic face matching.

STEP 03

Share to Your Socials

Plan, schedule, publish and reply - all without leaving Jam.

Instagram · Facebook · TikTok · LinkedIn · YouTube · X · Pinterest

STEP 03 · SHARE & ENGAGE

Share & Engage

- **Scheduling & Posting**

Plan your calendar and publish to every platform at the right time.

- **AI Auto Caption & Attribution**

Generate on-brand captions and credit original creators automatically.

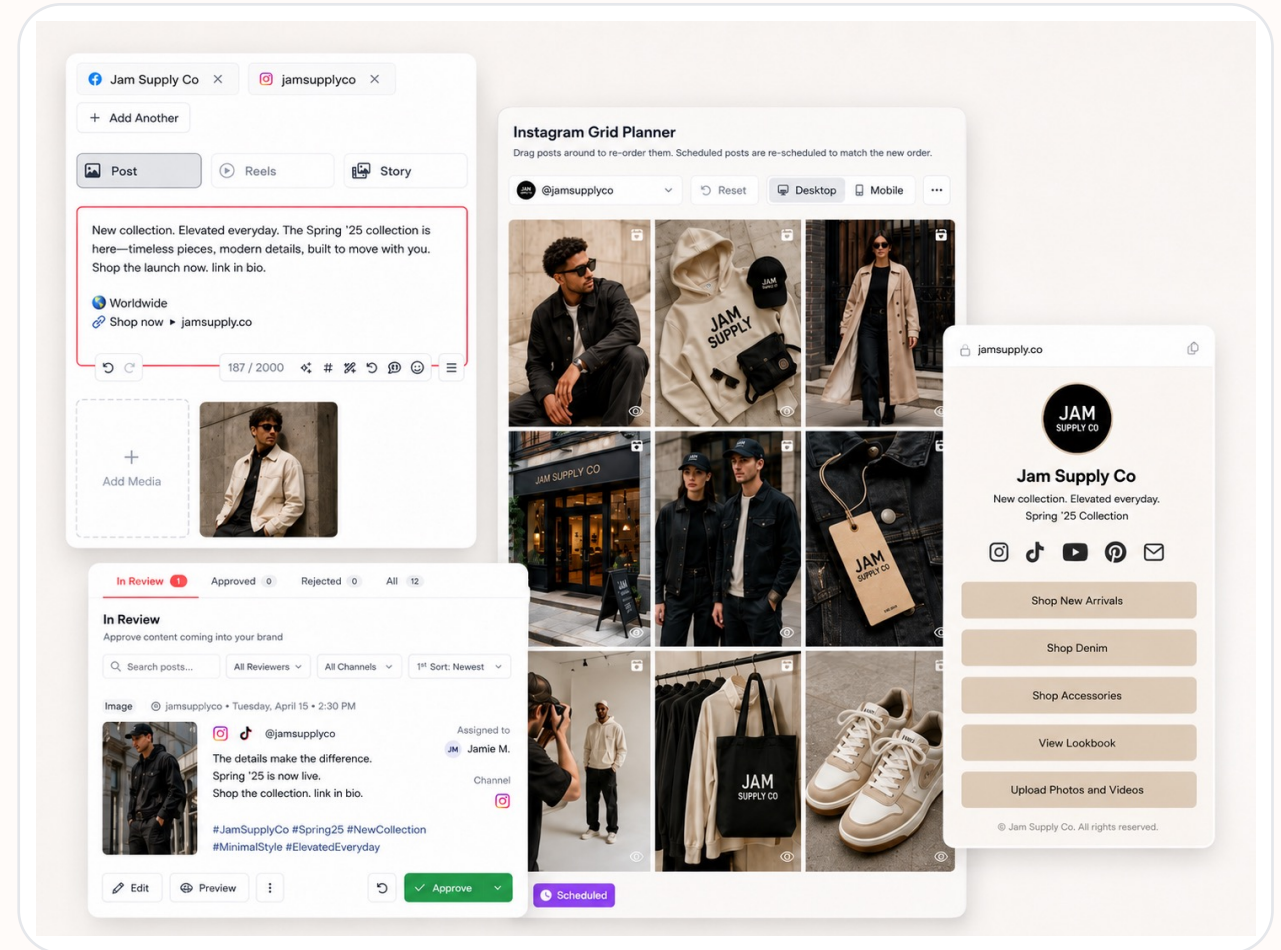

- **Social Inbox**

Reply to every comment, DM and mention from a single inbox.

- **Link in Bio**

Turn the link in your bio into a trackable, clickable landing page.

From DAM to Jam. We can migrate from any platform and integrate to Jam.

How teams Jam.

Events & Sports

Capture every moment on the ground, find every face, and share highlights while the crowd is still buzzing.

-  Upload form & QR code
-  iOS & Android capture app
-  People face detection
-  AI tagging & search
-  Shareable galleries
-  Scheduling & posting

Ecommerce Brands

Every product shoot, campaign and UGC drop in one library - with media synced straight to your Shopify products.

-  Shopify product tag & sync
-  User generated content (UGC)
-  AI captions & attribution
-  Smart collections
-  Link in bio
-  Scheduling & posting

Agencies

Keep every client's media organised in collections, route posts through approvals, and publish across every channel.

-  Shared collections
-  Post approvals
-  Scheduling & posting
-  Social inbox
-  AI auto captions
-  Analytics
